Education

Bachelor of Computer Science

University of Future Tech, 2021 - Present

- Top student in class with GPA: 4.0/4.0
- Received Academic Excellence Award for 3 consecutive years

Internship Experience

AI Research Intern, OpenAI Innovation Lab (Summer 2024)

- Assisted in designing advanced neural network architectures for vision tasks
- Built internal tooling to evaluate model performance across diverse datasets

Software Engineer Intern, Google (2023)

- Optimized cloud-based services and worked on the internal deployment pipeline
- Designed user interface components for internal tools using React

Web Development Intern, TechVerse (2022)

- Built and maintained responsive websites for clients
- Integrated REST APIs and ensured cross-browser compatibility

Selected Projects

1. Smart Portfolio Dashboard - Created a personal finance tracker with real-time stock APIs and D3.js for data visualization.
2. CampusConnect - A networking app for students with smart chat and event-sharing features.
3. CV Wizard - Web app that generates stylish resumes from user input.
4. Virtual Lab Simulator - Built a physics lab simulation platform for remote education.
5. EcoTrack - An environmental monitoring dashboard using satellite data and ML.

Skills

- Programming: Python, JavaScript, C++, Java
- Web: HTML, CSS, React, Node.js, REST APIs
- Tools: Git, Docker, VS Code, Figma, Firebase
- Languages: English (fluent), Arabic (fluent), Spanish (fluent)
